WISCONSIN FALCONWATCH 2016 Nesting Season Overview

This year there was a known total of 103 young produced at 34 successful nest sites. Fourteen nests were located along the Lake Michigan shoreline, 4 along the Fox River, 2 along the Wisconsin River system, 3 on the shores of Lake Superior, 9 along the Mississippi River (7 on cliffs) (*source RRP*), and 2 inland at Madison and Jefferson.

Overall, we saw a 3.0% increase in the number of successful nests from 33 in 2015 to 34 in 2016. Total production was up from last year at 103 young and average production was up from 2.94 young/successful nest in 2015 to 3.03 young/successful nest in 2016. Of note is the increase of successful cliff nests from 5 in 2015 to 7 in 2016 – a 40% increase.

These numbers once again reflect known production but the actual numbers may be higher. It is likely there are at least a few nests that we don't know about and others where outcomes are unknown such as the bridge nest at De Pere.

There were also 3 nests that were known to have failed this year due to various reasons. And once again there are those sites where we may never know outcomes because of limited access and/or viewing limitations such as the Racine quarry and the Roland Kampo bridge.

The table below explains nesting terminology used in this report. All nesting information is extracted from known, verifiable data.

Successful =	Young produced
Failed =	Eggs Laid – no young produced
Active/Non-productive =	Falcons observed – no eggs produced
Outcome Unknown =	No confirmed outcomes
Color band: (b/r) =	Black/Red
Color band: (b/g) =	Black/Green
Color band: (b/blu) =	Black/Blue
Color band: (bl) =	Black

Once again I'd like to express my sincere gratitude to the many corporations, organizations and individuals (see Acknowledgements on page 43 in this report) that helped to make 2016 another successful year for Wisconsin's Peregrines.

The following pages provide an overview of the 2016 nesting season.

Pleasant Prairie: We Energies Pleasant Prairie Power Plant

Nesting Details

Adult Female: Unbanded

Adult Male: "PBR" (b/r) 07/B, was produced at Milwaukee's Miller Brewery nest site in 2009. This is PBR's 5th year at this site.

Eggs: 3 laid - March 31 – April 5
Projected Hatch Dates: May 8 – 10
Eggs Hatched: 1 on May 8
Banded: 1 male on May 31
Site Visits: May 31

Above: The unbanded adult female
Left: "Jeffery" shortly after banding

This site has been active since 1997 producing a total of 59 young (2.95/year).

Banding Data

Name	Sex	Project Band	USFWS Band
Jeffery	Male	(b/blu) 52/E	1126-16188

GPS: 42 Degrees 32' 16 N, 87 Degrees 54' 13 W

Kenosha: United Hospital System, Kenosha Medical Center

Nesting Details

Adult Female: “Olympia” (b/r) 31/W, produced in 2012 at the south loop site on Michigan Ave. in Chicago, IL. This is her 2nd year at this site.

Adult Male: “Livingston” (b/r) 55/D, produced in 2010 at the MG&E site in Madison, WI, back for his 4th year.

Eggs: 3 laid between April 5 – 14

Projected Hatch Dates: May 11 – 13

Eggs Hatched: 2 on May 15

Banded: 1 female & 1 male on June 6

Site Visits: April 18, June 6

Note: 73/N was found dead on site on June 30.

Above: Olympia
Left: Sheri & Jafar

This site has been active since 2006 producing a total of 19 young (1.72/year).

Banding Data

Name	Sex	Color Band	USFWS Band
Sheri	Female	(b/blu) 73/N	1687-34579
Jafar	Male	(b/blu) 74/N	1687-34580

NOTE: 74/N could be a smaller female – banded with female bands.

GPS: 42 Degrees 34' 39 N, 87 Degrees 49' 11 W

Racine: Racine County Courthouse

Nesting Details

Adult Female: (b/g) R/13, produced in 2007 at the Tower Building in South Bend, IN, back for her 8th year.

Adult Male: “Beaster” (b/g) 67/M, produced in 2005 at We Energies Pleasant Prairie Power Plant, back for his 9th year.

Eggs: 4 laid between March 25 – April 1
Projected Hatch Dates: May 1 – 3
Eggs Hatched: 3 between May 2 – 4
Banded: 2 females & 1 male on May 23
Site Visits: March 25, April 6, May 4, 23

Above: R/13

Below: Banding day

This site has been active since 2002 producing a total of 43 young (2.87/year).

Banding Data

Name	Sex	Project Band	USFWS Band
KJ	Female	(b/blu) 53/M	1947-18219
RoseAnne	Female	(b/blu) 54/M	1947-18220
Len	Male	(b/blu) 67/A	1126-16177

NOTE: 53/M could be a large male.

GPS: 42 Degrees 43' 30 N, 87 Degrees 47' 03 W

Oak Creek: We Energies Oak Creek Power Plant

Nesting Details

Adult Female: “Eclipse” (b/r) 67/H, a 2009 falcon produced at the Rhodes State Office Tower in Columbus, OH. This is her 6th year at here.

Adult Male: “Scott” (b/g) M/Y, here for his 11th year was produced in 2000 at the Malteurop complex (formerly Froedtert Malt complex) in West Milwaukee, WI.

Eggs: 4 laid between March 22 – April 1
Projected Hatch Dates: April 29 – May 1
Eggs Hatched: 4 between May 1 – 2
Banded: 2 females & 2 males on May 23
Site Visits: February 19, May 23

Above: Eclipse on banding day
Below: Her 4 youngsters

This site has been active since 1998 producing a total of 54 young (2.84/year).

Banding Data

Name	Sex	Project Band	USFWS Band
Ophelia	Female	(b/blu) 49/M	1947-18215
Hydra	Female	(b/blu) 50/M	1947-18216
Triton	Male	(b/blu) 63/A	1156-22848
Styx	Male	(b/blu) 64/A	1156-22849

GPS: 42 Degrees 84' 20 N, 87 Degrees 82' 83 W

Milwaukee: US Bank

Nesting Details

Adult Female: “Adah” (b/r) 01/S, a female produced in 2010 at Queen’s Bluff, Winona, MN. Adah has been present at this site since 2013 and this was her second successful nest.

Adult Male: Not ID’d but banded.

Eggs: 5 between March 17 – 25

Projected Hatch Dates: April 25 – 27

Eggs Hatched: 5 by May 3

Banded: 3 females & 2 males on May 16

Site Visits: March 21, 25, May 3, 16, June 15

Note: 38/M was found dead on June 14 – window collision.

This site has been active since 1988 producing a total of 59 young (2.03/yr.).

Banding Data

Name	Sex	Project Band	USFWS Band
Gidget	Female	(b/blu) 38/M	1947-18204
Josie	Female	(b/blu) 39/M	1947-18205
Blake	Female	(b/blu) 40/M	1947-18206
Darrel	Male	(b/blu) 55/A	1156-22839
Squeek	Male	(b/blu) 56/A	1156-22840

GPS: 43 Degrees 02' 18 N, 87 Degrees 54' 10 W

Above: “Adah”, photographed at the US Bank

Below: Her 5 young on banding day

Milwaukee: UW Milwaukee, EMS Building

Nesting Details

Adult Female: Unbanded, likely her 6th year here.

Adult Male: “Lightning” (b/r) 84/R, produced in 2012 at We Energies Oak Creek Power Plant in Oak Creek, WI. Last year, Lightning nested at We Energies Milwaukee County Power Plant in Wauwatosa, WI. This was Lightning’s 2nd year at this site.

Eggs: 4 laid between March 23 - April 30

Projected Hatch Dates: April 29 – May

Eggs Hatched: 3 between April 30 – May 2

Banded: 2 females & 1 male on May 19

Site Visits: May 19

Note: 44/M was found dead on site on August 13 – had been dead for some time.

This site has been active since 2009 producing a total of 30 young (3.75/year).

Banding Data

Name	Sex	Project Band	USFWS Band
Florence	Female	(b/blu) 43/M	1947-18209
Genevieve	Female	(b/blu) 44/M	1947-18210
Gaylord	Male	(b/blu) 58/A	1156-22843

GPS: 43 Degrees 01' 25 N, 87 Degrees 53' 54 W

Milwaukee: St. Joseph's Hospital

Nesting Details

Adult Female: (b/r) 91/P, produced in 2014 at the Consumer's Energy B.C. Cobb Plant in Muskegon, MI. This same female was also ID'd at the Port Washington Generating Station nest box in Port Washington, WI on February 17. This is her first year at St. Joe's.

Adult Male: "Wildcat" (b/r) 71/P, produced in 2013 at We Energies valley Power Plant in Milwaukee, WI. This is also his first year at St. Joes.

Note: There was a complete turnover of adults at St. Joe's this season.

Eggs: 4 laid between March 25 – April 3

Projected Hatch Dates: May 2 – 4

Eggs Hatched: 4 between May 2 – 4

Banded: 2 females & 2 males on May 23

Site Visits: March 21, 22, April 5, 19, May 23

This site has been active since 2011 producing a total of 20 young (3.33/year).

Above: (b/r) 91/P perched at her nest box on a gray, cloudy day.

Below: Banding day

Banding Data

Name	Sex	Project Band	USFWS Band
Hillary	Female	(b/blu) 51/M	1947-18217
Epic	Female	(b/blu) 52/M	1947-18218
Donald	Male	(b/blu) 65/A	1156-22850
Bowie	Male	(b/blu) 66/A	1126-16176

GPS: 43 Degrees 04' 26 N, 87 Degrees 58' 37 W

Milwaukee: Miller Coors Brewery

Nesting Details

Adult Female: Unbanded

Adult Male: Unbanded

Note: This site was successful again after a lapse of 5 years.

Eggs: 4 laid between April 5 – 13

Projected Hatch Dates: May 11 – 13

Eggs Hatched: 1 on May 16

Banded: 1 female on June 6

Site Visit: March 21, 22, April 5, 13, 19, May 19

Note: 75/N was found injured in Milwaukee on July 30, treated at WHS and released on August 4.

*Above: The unbanded adult female
Below left: "Freddie" shortly after hatching*

This site has been active since 2002 producing a total of 27 young (1.92/yr.).

Banding Data

Name	Sex	Project Band	USFWS Band
Freddie	Female	(b/blu) 75/N	1687-34581

GPS: 43 Degrees 02' 28 N, 87 Degrees 57' 49 W

Malteurop, West Milwaukee, WI *(formerly Froedtert Malt Complex - ADM)*

Nesting Details

Adult Female: "Amylase" (b/g) *E/*S, a 2008-produced falcon from the US Steel old coke plant in Gary, IN, back for her 7th year.

Adult Male: "JJ" (b/g) 96/N, produced in 2005 at the Valero Renewables site at Jefferson, WI was back for his 8th year.

Eggs: 4 between March 19 - 26

Projected Hatch Dates: April 26 – 28

Eggs Hatched: 4 between April 25 – 29

Banded: 2 females & 2 males on May 18

Site Visits: May 18

Above: "JJ"

Left: The 4 youngsters on banding day

This site has been active since 1995 producing a total of 61 young (2.77/year).

Banding Data

Name	Sex	Project Band	USFWS Band
Julie Roze	Female	(b/blu) 41/M	1947-18207
America	Female	(b/blu) 42/M	1947-18208
Knetz66	Male	(b/blu) 54/A	1156-22841
Wort	Male	(b/blu) 57/A	1156-22842

GPS: 42 Degrees 59' 58 N, 87 Degrees 58' 02 W

Wauwatosa: MRC Thermal Power Plant

(Formerly We Energies Milwaukee County Power Plant)

Nesting Details

Adult Female: (b/r) 33/U, produced in 2012 at the Eastlake Power Plant in Eastlake, OH. This was her 3rd year at this site.

Adult Male: "Asa" (b/r) 17/M, produced in 2013 at the UW-Milwaukee EMS Building site in Milwaukee, WI. This was Asa's 2nd year at this site.

Eggs: 4 laid between March 29 – April 5

Projected Hatch Dates: May 6 – 8

Eggs Hatched: 4 between May 7 – 8

Banded: 3 females & 1 male on May 27

Site Visits: May 27

Above: 33/U

Below left: Her 4 young after banding

This site has been active since 2013 producing a total of 13 young (3.25/year).

Banding Data

Name	Sex	Project Band	USFWS Band
Dauntless	Female	(b/blu) 69/N	1687-24585
Amelia	Female	(b/blu) 71/N	1687-34577
Woomera	Female	(b/blu) 72/N	1687-34578
Corsair	Male	(b/blu) 70/N	1687-34576

NOTE: 70/N could be a smaller female – banded with female bands.

GPS: 43 Degrees 02' 45N, 88 Degrees 01' 39 W

Port Washington: We Energies Port Washington Generating Station

Nesting Details

Adult Female: “Brinn” (b/r) 84/X, produced in 2012 at Gold Hoist cliff, Split Rock State Park, Lake, Co., MN. This is her 3rd year at this site.

Adult Male: “Ives” (b/g) 78/N, produced in 2004 at the Edgewater Generating Station site in Sheboygan, WI - likely present since 2007 when he was first ID'd at this site.

Eggs: 3 laid between March 21 – 25
Projected Hatch Dates: April 27 – 29
Eggs Hatched: 2 between May 2 – 3
Banded: 1 female & 1 male on May 24
Site Visits: May 24

Note: 68/A was found injured in late June and treated for eye injuries at the Wildlife in Need Center. His injuries are such that he will be unreleasable.

Above: “Brinn”
Left: “Squid” & “Hecate”

This site has been active since 2000 producing a total of 56 young (3.29/year).

Banding Data

Name	Sex	Project Band	USFWS Band
Hecate	Female	(b/blu) 55/M	1947-18221
Squid	Male	(b/blu) 68/A	1126-16179

GPS: 43 Degrees 23' 01 N, 87 Degrees 52' 13 W

Sheboygan: Edgewater Generating Station

Nesting Details

Adult Female: (b/g) P/63, produced in 2005 at Grand Haven L. and P., Sims Plant in Grand Haven, MI. This was her 9th year here.

Adult Male: Unidentified, banded b/g

Eggs: 4 laid between March 19 – 25

Projected Hatch Dates: April 25 – 27

Eggs Hatched: 4 between April 29 - May 2

Banded: 2 females & 2 males on May 20

Site Visits: May 22

Above: P/63 – the adult female

Below right: Her 4 youngster on banding day

This site has been active since 1992 producing a total of 78 young (3.44/year).

Ignatius	Male	(b/blu) 79/N	1687-34585

NOTE: 79/N may be a smaller female – banded with female bands.

GPS: 44 Degrees 05’ 19 N, 87 Degrees 39’ 16 W

Kewaunee: Dominion Nuclear Power Plant *(Decommissioned)*

Nesting Details

Adult Female: Unidentified

Adult Male: Unidentified

Senior Environmental Compliance Coordinator Ted Maloney reports that the falcons went back to their old nest box atop the inaccessible containment dome this year and 2 young were produced. Ted observed both young outside the nest box on June 16 and captured the image with this account.

Because access to the top of the containment dome is prohibited we were unable to band here this year.

This site has been active since 2001 producing a total of 37 young (2.31/year).

Above: *One of 2 young produced this year shortly after fledging.*

GPS: 44 Degrees 20' 31 N, 87 Degrees 32' 10 W

FOX RIVER NEST SITES

Green Bay: WPS Pulliam Power Plant

Nesting Details

Adult Female: (b/r) A/67, produced in 2013 at Gold Hoist cliff, Split Rock Lighthouse State Park, Lake Co., MN. This was her 2nd year at this site.

Adult Male: “Bones” (b/r) 97/R, produced in 2012 at St. Joseph’s Hospital in Milwaukee, WI. This was his 2nd year at this site.

Above: A/67 with her newly hatched chick. Captured on the web cam by Pete Roy.

Eggs: 4 laid between April 8 – 15

Projected Hatch Dates: May 16 – 18

Eggs Hatched: 3 between May 18 – 20

Banded: 2 females & 1 male on June 7

Site Visit: June 7

This site has been active since 1996 producing a total of 62 young (2.95/year).

Banding Data

Name	Sex	Project Band	USFWS Band
Spark1	Female	(b/blu) 81/N	1687-34587
Audris	Female	(b/blu) 82/N	1687-34588
Peck	Male	(b/blu) 80/N	1687-34586

NOTE: 80/N could be a smaller female – banded with female bands.

GPS: 44 Degrees 32' 22 N, 88 Degrees 00' 32 W

Green Bay: Georgia Pacific Mill

Nesting Details

Adult Female: “Chloe” (b/r) 53/E, produced in 2010 at the WPL Edgewater Generating Station site in Sheboygan, WI was back for her 4th year.

Adult Male: Believed once again to be “Elmo” (b/g) E/08, produced in 2006 at the Busch Agricultural Complex in Manitowoc, WI, likely back for his 8th year.

Eggs: 4 laid between March 21 – 28

Projected Hatch Dates: April 26 – 28

Eggs Hatched: 4 between April 28 – May 1

Banded: 2 females & 2 males on May 20

Site Visit: May 20

Above: “Chloe”
Left: Her 4 youngsters

This site has been active since 2008 producing a total of 26 young (2.9/yr.).

Banding Data

Name	Sex	Project Band	USFWS Band
Notus	Female	(b/blu) 47/M	1947-18213
Eurus	Female	(b/blu) 48/M	1947-18214
Zephyrus	Male	(b/blu) 61/A	1156-22846
Boreas	Male	(b/blu) 62/A	1156-22847

GPS: 44 Degrees 29' 33 N, 88 Degrees 01' 50 W

Kaukauna: Thilmany Mill

Nesting Details

Adult Female: Unbanded

Adult Male: "Daryl" (b/g) 44/M, produced in 2003 at the Busch Agricultural Resources site in Manitowoc, WI. This is likely his 5th year at this site.

Right: Lily & Stella & with an infertile egg on banding day

Eggs: 4 laid between March 22 – 29

Projected Hatch Dates: April 29 – May 1

Eggs Hatched: 2 by May 3

Banded: 2 females on May 25

Site Visit: May 25

This site has been active since 2007 producing a total of 31 young (3.1/yr.).

Banding Data

Name	Sex	Project Band	USFWS Band
Lily	Female	(b/blu) 59/M	1947-18225
Stella	Female	(b/blu) 65/N	1687-24581

GPS: 44 Degrees 16' 57 N, 88 Degrees 15' 11 W

Oshkosh: UW Oshkosh

Nesting Details

Adult Female: “Deborah”
(b/r) 04/E, produced in 2009 at the Evanston Library site in IL – back for her 6th year.

Adult Male: “Talon” (b/g)
51/R, produced in 2011 at the Georgia Pacific paper mill in Green Bay, WI – his 4th year at this site.

Eggs: 4 laid between March 24 – 31
Projected Hatch Dates: May 1 – 3
Eggs Hatched: 4 between May 1 – 3
Banded: 3 females & 1 male on May 24
Site Visit: May 24

Note: “Deborah” was found injured on site on May 16 and taken into rehab for treatment. For the ensuing 3 weeks “Talon” cared for all 4 young on his own bringing in prey 5-6 times/day. On June 9, I observed a new adult female on site and the following day was able to ID her as “Julia” (b/r) 19/W. Julia was produced in 2011 at Chicago’s Lakeview nest site.

Above: Web cam image of Deborah
Below: Talon caring for his chicks

She was injured shortly after fledging, rehabbed and later released on October 11 at Ottawa, IL. Interestingly, I also ID’d Julia at the Wisconsin River I90/94 bridge site on May 4, 2015 where she made an unsuccessful nesting attempt. On June 23, I also captured a web cam image of an unbanded adult peregrine at this site.

This site has been active since 2011 producing a total of 16 young (2.67/yr.).

Banding Data

Name	Sex	Project Band	USFWS Band
Daisy	Female	(b/blu) 56/M	1947-18222

WISCONSIN RIVER NEST SITES

Pardeeville: Alliant Columbia Generating Station

Nesting Details

Adult Female: (b/r) 02/H, produced in 2009 at the MEC Louisa site in Louisa Co., IA, back for her 6th yr.

Adult Male: “Cooper” (b/g) E/52, produced in 2007 at the Kenosha Memorial Hospital nest site in Kenosha, WI. This was the first year Cooper was ID’d here.

Eggs: 5 laid between March 25 – April 5

Projected Hatch Dates: May 2 – 4

Eggs Hatched: 3 between May 3 – 5

Banded: 2 females & 1 male on May 26

Site Visit: May 26

Note: 68/N was killed by its siblings in the nest box on June 9.

Above: 02/H

Below left: Banding day

This site has been active since 2006 producing at least 37 young (3.36/yr.).

Banding Data

Name	Sex	Project Band	USFWS Band
Maverick	Female	(b/blu) 67/N	1687-24583
Goose	Female	(b/blu) 68/N	1687-24584
Iceman	Male	(b/blu) 45/E	1126-16184

NOTE: 68/N could be a large male – banded with female bands.

GPS: 43 degrees 29' 17 N, 89 degrees 25' 15 W

Rothschild: WPS Weston Power Plant

Nesting Details

Adult Female: “Rosalee” (b/r) C/94, produced in 2014 at the MG&E nest site in Madison, WI – back for her 2nd year.

Adult Male: “Sheldon” (b/r) 19/M, produced in 2013 at the UW-Oshkosh nest site in Oshkosh, WI back for his 2nd year.

Eggs: 4 laid between March 31 – April 4

Projected Hatch Dates: May 6 – 7

Eggs Hatched: 4 between May 8 – 9

Banded: 3 males on May 27

Site Visit: May 27

Note: 1 young died a day after hatching.

Above: Rosalee

Left: Her 3 young after banding

This site has been active since 2006 producing a total of 24 young (2.18/yr.).

Banding Data

Name	Sex	Project Band	USFWS Band
Pirate	Male	(b/blu) 49/E	1126-16185
Blaze	Male	(b/blu) 50/E	1126-16186
Spark2	Male	(b/blu) 51/E	1126-16187

INLAND NEST SITES

Madison: Madison Gas & Electric Company

Nesting Details

Adult Female: “Trudy” unbanded, likely the same female as previous 4 years.

Adult Male: “Melvin” (b/r) 80/P, produced in 2013 at We Energies Oak Creek Power Plant in Oak Creek, WI. This is Melvin’s 2nd year at MG&E.

Eggs: 4 laid between March 28 – April 2

Projected Hatch Dates: May 3 – 5

Eggs Hatched: 4 between May 4 – 6

Banded: 4 males on May 25

Site Visit: May 25

Above: Trudy

Left: The 4 youngsters on banding day

This site has been active since 2009 producing a total of 31 young (3.9/yr.).

Banding Data

Name	Sex	Project Band	USFWS Band
Jean	Male	(b/blu) 66/N	1687-24582
Paul	Male	(b/blu) 46/E	1126-16181
Billy	Male	(b/blu) 47/E	1126-16182
Witt	Male	(b/blu) 48/E	1126-16183

NOTE: 66/N could be a smaller female – banded with female bands.

GPS: 43 Degrees 04' 46 N, 89 Degrees 22' 28 W

Jefferson: Valero Renewables *(formerly Cargill Malt/Renew Energy)*

Nesting Details

Adult Female: “Smokey” (b/g) 82/A, produced in 2003 at the Edgewater site in Sheboygan, WI - her 13th year here.

Adult Male: “Suzuki” (b/g) E/06, was produced at We Energies Pleasant Prairie Power Plant in Pleasant Prairie, WI in 2006.

Eggs: 5 between April 6 – 21

Projected Hatch Dates: May 14 – 16

Eggs Hatched: 1 on May 24

Banded: 1 male on June 14

Site Visit: June 14

Above: Smokey at her new nest box

Left: Lex after banding

This site has been active since 2004 producing a total of 33 young (2.54/year).

Banding Data

Name	Sex	Project Band	USFWS Band
Lex	Male	(b/blu) 83/N	1687-34589

NOTE: 83/N could be a smaller female – banded with female bands

GPS: 43 Degrees 02' 28 N, 87 Degrees 57' 49 W

LAKE SUPERIOR SITES

Superior: General Mills

Nesting Details

Adult Female: “Buffy” (b/r) 29/S, was trapped and banded by Dave Evans near this site on January 16, 2012. This was her 5th year here.

Adult Male: “Old Globe” (b/r) 97/B, was also trapped and banded near this site on March 9, 2012. This was his 5th year here as well. Dave Evans re-banded this falcon on February 2, 2016 when he trapped it and saw the original color band was missing. New color band is: **(b/blu) 89/A**.

Eggs: At least 2

Eggs Hatched: At least 2

Banded: 2 females on June 7

Above: Makayla & Teresa after they were banded by Dave Evans

Photo credit: Dave Evans

This site has been active since 2009 producing a total of 16 young (2.0/yr.).

Banding Data

Name	Sex	Project Band	USFWS Band
Makayla	Female	(b/blu) 62/H	1687-14843
Teresa	Female	(b/blu) 63/H	1687-14844

GPS: 48 Degrees 44' 36 N, 92 Degrees 06' 33 W

Superior/Allouez: Burlington Northern Ore Docks

Nesting Details

Adult Female: Unidentified

Adult Male: Unidentified

Dave Evans reports that the peregrines moved to a new location on Dock 4 this year and utilized an old Raven's nest. On June 13 he believes he may have observed 3 young (approx. 30 days of age) under poor, foggy conditions. He confirmed 2 young present on both June 19 and 22.

*Above: The abandoned ore dock
Photo credit: Dave Evans*

This site has been active since 2015 producing a total of 4 young (2.0/yr.).

GPS: 46 Degrees 70' 17 N, 92 Degrees 02' 63 W

Ashland: Xcel Energy Bay Front Generating Station

Nesting Details

Adult Female: Unbanded

Adult Male: Unbanded

Eggs: At least 3

Eggs Hatched: At least 3

Banded: 2 females & 1 male on June 16

This is the third nesting at this site. Adding the young produced at the old ore dock since 2009 (9) to those produced at the BFGS (7), a total of 19 peregrines have been produced at Ashland thus far (2.38/yr.).

GPS: 46 degrees 58' 72 N, 90 degrees 90' 17 W

MISSISSIPPI RIVER NEST SITES

Photo Credits: BNSF RR Bridge - John Weeks, Eyass peregrines – L. Earl Bishop

Buffalo County: Maassen's Bluff – 3 young produced.

This site has been active since 2001 producing a total of 22 young (1.38/yr.).

GPS: 44 Degrees 22' 59 N, 91 Degrees 57' 43 W

Pierce County: Diamond Bluff – 2 young produced.

This site has been active since 2011 producing a total of 9 young (1.50/yr.).

GPS: 44 Degrees 37'43 N, 92 Degrees 35' 17 W

Alma: 12-Mile Bluff – 4 young produced.

This site has been active since 2007 producing a total of 32 young (3.20/yr.).

GPS: 44 Degrees 18'30 N, 91 Degrees 54' 30 W

Genoa: Dairyland Power Cooperative – 4 young produced.

This site has been active since 1998 producing a total of 64 young (3.37/yr.).

GPS: 43 Degrees 33' 33 N, 91 Degrees 13' 56 W

La Crosse: US Bank – 3 young produced.

This site has been active since 2006 producing a total of 29 young (2.63/yr.).

GPS: 43 Degrees 48' 48 N, 91 Degrees 15' 10 W

Buffalo County: Nelson, Twin Bluff – 4 young produced.

This site has been active since 2014 producing a total of 7 young (2.33/yr.).

Pepin County: West Bluff – 3 young produced.

This site has been active since 2005 producing a total of 27 young (2.25/yr.).

GPS: 44 Degrees 31' 51 N, 92 Degrees 17' 42 W

Crawford County: Lynxville Bluff – 2 young produced.

This site has been active since 2003 producing a total of 27 young (1.93/yr.).

GPS: 43 Degrees 17' 08 N, 91 Degrees 02' 58 W

Buffalo County, Castle Rock – 2 young produced.

This site has been active since 2001 producing a total of 28 young (1.75/yr.)

GPS: 44 Degrees 04' 73 N, 091 Degrees 33' 53 W

Mississippi River nesting data & information provided by Amy Ries.

For complete information visit the **Raptor Resource Project (RRP)** web site at:

www.raptorresource.org/

Above: “PBR” (b/r) 07/B, was produced at Milwaukee’s Miller Brewery nest site in 2009. He nested again at We Energies Pleasant Prairie Power Plant - his 5th year at this site.

FAILED NEST SITES

Milwaukee: We Energies Valley Power Plant

Nesting Details

Adult Female: Unbanded

Adult Male: “Hercules” (b/r) 60/R,
produced in 2011 at the St. Joe’s Hospital
site in Milwaukee – back for his 3rd year.

Eggs: 4 laid between March 20 – 27
Projected Hatch Dates: April 26 – 28
Eggs Hatched: Failed
Infertile Eggs Salvaged: June 1
Site Visits: June 1

This site has been active since 2002
producing a total of 31 young (2.21/yr.).

GPS: 43 Degrees 02’ N, 87 Degrees 57’ 49 W

Above: Hercules at his nest box

Menasha: SCA Tissue

Nesting Details

Adult Female: Unidentified

Adult Male: "Thor" (b/g) 76/N, produced in 2004 at the Busch Agricultural Resources complex in Manitowoc, WI. It's likely this male has been nesting at the nearby Roland Kampo Bridge site for some time.

It's possible that with the construction project completed on the east half of bridge, the falcons may have left the SCA site and returned there since they disappeared shortly after the eggs failed to hatch.

Eggs: 2 found on April 14

Projected Hatch Dates: Unknown

Eggs Hatched: Failed

Site Visits: April 14, 21

Above: "Thor" in an image taken on April 14.

Below left: The 2 infertile/addled eggs

This site has been active since 2015 producing a total of 2 young (1.0/yr.).

GPS: 44 degrees 20' 53 N, 88 degrees 45' 61 W

Green Bay: UW Green Bay

Nesting Details

Adult Female: “Mimi” (b/r) D/54, produced in 2014 at We Energies Milwaukee County Power Plant.

Adult Male: Unbanded

Once again peregrines were present at this site showing up in early March. Tom Erdman reports there may have been 3 peregrines present as 2 of the falcons (females) were marked differently. As has been the case in past years, the falcons bypassed the nest box and again attempted nesting on a precarious ledge not using the nesting platform provided for them on the same ledge. In the end, all 5 eggs were lost. We’re still hopeful something can be done to create an attractive and safe nesting situation here before next spring.

Above: Mimi

Photo credit: Nancy Nabak

GPS: 44 degrees 53' 12 N, 88 degrees 92' 12 W

ACTIVE/NON-PRODUCTIVE SITES

Milwaukee: Hoan Bridge/MMSD Territory (Veolia Water)

Adult Female: Unbanded imm. female and ad. female.

Adult Male: “Rounder” (b/g) B/38, produced in 2007 at Milwaukee’s Miller Brewery site, back for his 5th year.

An unbanded adult female peregrine was present here over the winter and through March and was then replaced by an immature female in April. I observed “Rounder” courting this new female on April 5th but no eggs were laid this season.

Above: *The unbanded adult female on March 21*

Below: *The unbanded immature female on April 13*

This site has been active since 2000 producing a total of 12 young (0.71/year).

GPS: 43 Degrees, 01’ 16 N, 87 Degrees, 54’ 04 W

Devils Lake State Park: East Bluff Quarry

Bill Smith visited this site on January 23, February 19, March 7, 11, 21, 29, April 7, 9, 20, 30 May 4, 13, 28, June 4, 7 & July 8, 15, 19, 27. He first observed a peregrine on April 7 and Rich Staffen confirmed an adult pair present on April 9 with one adult sporting a b/r color band and silver federal band.

Bill continued his observations through the nesting season and documented territorial defense and courtship activities. The female apparently used the same ledge as last year through May 13 at which time she also began her molt. Afterwards her activity was more focused on a different part of the cliff. On July 8 he noted the adult male was unbanded.

Peregrines were observed here through July 19 but none were found during subsequent visits. It is unknown if eggs were laid here this season but no prey deliveries to the nest ledge were observed nor were any young seen.

GPS: 43 Degrees 41' 30 N, 89 Degrees 70' 20 W

Wisconsin River: I90/94 Bridge

Bill Smith visited this site on March 8, April 7, 17, and May 3, 16. He reported an adult pair present with one banded b/r and believes this was "Julia" (b/r) 19/W, the same female present last year.

The pair was defensive in the area used last year until May 3. But afterwards they were observed at a different location of the bridge. By June 6, neither bird could be found.

Interestingly the adult female we ID'd here last year as "**Julia**" (b/r) 19/W was ID'd at the UW-Oshkosh nest site on June 9th, 3 weeks after the resident nesting female was injured and picked up for rehab. As of mid-August, Julia was still at the UW-Oshkosh site.

GPS: 43 Degrees 44' 64 N, 89 Degrees 49' 33 W

Wyalusing: Wyalusing Quarry

Amy Ries reports that an immature and an adult peregrine were present here again but did not nest.

Pepin County: Maiden Rock

Amy Ries reports that peregrines were observed here at beginning of season, but they vanished and were not seen after early May. She also reports that Turkey vultures nested at this site.

GPS: 44 Degrees 30' 06 N, 092 Degrees 17' 17 W

Grant County: Glenn Haven Cliff

Amy Ries reports that an immature and an adult peregrine were present here as well but also did not nest.

GPS: 42 degrees 50' 13 N, 091 Degrees 04' 23 W

Grant County: Platte River North

Female: Immature

Male: Immature

Bill Smith and Jane Furchgott surveyed this and other cliffs in the vicinity and saw no activity. Bill Smith visited this site on April 14th and found a pair of immature peregrines present. One of the pair flew 500 ft. to next cliff north (Platte River North Alternate), perched, and then returned to the original cliff. On May 5th, Bill and Ken Lange also found an immature pair present exhibiting bowing and chipping. On July 13th Bill Smith and Amy Ries found what was likely this pair present on the alternate site to the north.

GPS: Platte River North: 42 Degrees, 37' 21 N, 90 Degrees 40' 21 W
Platte River North Alternate: 42 Degrees 37' 31 N, 90 Degrees 40' 28 W

Grant County: Dugway Road

Female: Immature

Male: Adult

On March 12th Bill Smith and Jane Furchgott visited this site but no falcons were observed. On May 26th Bill Smith and Brett Mandernack saw a food exchange and pinpointed the likely eyrie location. On June 13th Amy Ries, Dave Kester, Brett Mandernack, and Bill Smith visited the site to band and could find no sign of young. An adult male was seen twice, but was not defensive.

GPS: 42 Degrees 50' 13 N, 91 Degrees 04' 22 W

Door County: Rock Island

Sub-adult Female: Unbanded

Adult Male: Unbanded

Peregrines were present here again this season. On June 8th Dan Goltz, Randy Holm and Melody Walsh reported a pair present on the dolomite cliffs on the NW side of the island. Melody along with Dale & Glenys Bird found a single falcon present on June 24th. And Melody & Randy found a pair present on both July 10th and August 2nd. Bill Smith and I also found an adult male present on June 29th.

Because this site is off the beaten track so to speak with regards to other falcons nesting nearby and related activity, my feeling is that the adult male may have limited options regarding finding an adult female. I believe all it will take for a successful nest to occur here is for a full adult female to be present. If this year's sub-adult female survives the winter she may return to fill that void.

Above: *The sub-adult female*
Below: *The adult male*
Photo credits: *Melody Walsh*

GPS: 45 Degrees 42' 84 N, 86 Degrees 83' 02 W

OUTCOME UNKNOWN

Racine Quarry

I visited this site again this year on two occasions but never saw any falcons. There were also Turkey vultures present during both visits. And, as in years past, with limited viewing opportunities, we'll likely never know one way or another whether peregrines nest here.

Menasha: Roland Kampo Bridge

With the large construction/repair project nearing completion the barges & cranes have been moved from the east half of the bridge. I believe the peregrines that laid 2 eggs at the failed SCA Tissue site in Menasha this year (see page 32 of this report) may have returned to the bridge after their nest failed. It will be interesting to see if peregrines even attempt nesting at the SCA site next spring now that the bridge is available again.

Sturgeon Bay: Bay View Bridge

Although there were no observations from here this season, an adult peregrine was found dead under the nearby Oregon Street Bridge in Sturgeon Bay on April 19, 2016. So its entirely possible peregrines are nesting on one of these bridges but it will take some dedicated observation to document exactly where.

De Pere: De Pere Bridge

I visited this site on June 7 and as expected the adult female was found on her favorite perch – a large red warning sign adjacent to the bridge. I spent an hour at the end of the observation pier and the entire time she never left her perch nor did I see a male. Efforts to get a nest box installed at the nearby Expera Mill failed.

WISCONSIN PRODUCED PEREGRINES NESTING IN OTHER STATES

Following is known information on WI-produced peregrines that nested or were identified in other states for 2016.

Illinois

“Nitz” (b/g) 2/*Y, a female produced in 2001 at the Malteurop site (*formerly Froedtert Malt*) in West Milwaukee, WI paired with **“Mouse” (b/g) W/72**, a male produced in 2008 at the North Broadway site in Chicago. The pair nested at the Univ. of IL Chicago site producing 2 young.

“Squawker” (b/g) 48/M, a male produced in 2003 at We Energies Pleasant Prairie Power Plant in Pleasant Prairie, WI paired again with a female **“Nona” (b/g) 64/D** produced in 2004 at the Firststar Bank site in Cedar Rapids, IA. The pair once again nested at the Evanston Library site in Evanston, IL where they produced 3 young.

“Lisa” (b/g) R/39, a female produced in 2009 at the WPS Pulliam Power Plant in Green Bay, WI paired with **“Andy” (b/g) 97/K**, a male produced in 2009 at Chicago’s Uptown Theatre site. The pair nested at Chicago’s Wacker Drive site producing 4 young.

“Patsy” (b/r) 63/V, a female produced in 2012 at the Dairyland Power Coop in Alma, WI paired with an unidentified male. In 2015 her mate was **“Greg”**, a male produced in 2005 at the Racine County Courthouse site in Racine, WI. The pair nested at the Midwest Generation site in Waukegan, IL producing 1 young.

“Bob” (b/g) R/98, a female produced in 2008 at the Thilmany Mill site in Kaukauna, WI paired with an unbanded adult male. The pair nested at Chicago’s South Loop site producing 4 young.

“Cofrin” (b/r) C/90, a female produced in 2014 at the Georgia Pacific Mill site in Green Bay, WI paired with an unbanded adult male. The pair nested at Chicago’s Broadway site producing 3 young.

Indiana

“Chantal” (b/r) *B/*C, a female produced in 1998 at the Malteurop site (*formerly Froedtert Malt*) in West Milwaukee, WI paired “Sesenta (b/r) 36/R, a male produced in 2012 at the Market Tower site in Indianapolis, IN. The pair nested at the Indianapolis Market Tower in Indianapolis, IN producing three young.

“Maltese” (b/r) 47/V, a female produced in 2013 at the Malteurop site (*formerly Froedtert Malt*) in West Milwaukee, WI paired with an unbanded male at the South Bend, City-County Tower Building site in South Bend, IN. The pair produced 3 young.

Minnesota

“Michelle” (b/g) P/87, a female produced in 2005 at Maassens’ Bluff in Buffalo County, WI, paired with an unbanded male at Great Spirit Bluff at Dresbach, MN. The pair produced 4 young.

“Seapro” (b/g) R/97, a female produced in 2009 at We Energies Port Washington Generating Station in Port Washington, WI paired with “Frisco” (b/g) K/13, a male produced in 2006 at the Lock and Dam 1 site in Minneapolis, MN. The pair nested at the UMN Mayo site in Minneapolis producing 4 young.

“Sam” (b/g) B/82, a male produced in 2008 at the US Bank site in La Crosse, WI paired with Jaime b/g P/94, a female produced in 2006 at the Prairie Island Power Plant. The pair nested at the Delta Airlines site at, Minneapolis/St. Paul international Airport in Minneapolis producing eggs that did not hatch.

“Ava” (b/r) *B/*W, a female produced at the Racine County Courthouse nest site in 2014 paired with b/g C/35, a male produced in 2006 at the Port Sheldon JH Power Plant in Ottawa, MI. The pair nested at Precipice Bluff, Whitewater State Park in Winona County, MN producing 3 young.

Michigan

“Carsten” (b/r) 81/W, a female produced in 2012 at Lee’s Bluff in Lynxville, WI paired with an unbanded adult male at the Houghton lift bridge in Houghton, MI. The pair produced 4 young.

Ohio

The OH DNR is no longer banding peregrines so there is no information available the 2016 nesting season.

WISCONSIN PRODUCED PEREGRINES NESTING IN CANADA

Ontario

Tracy Simpson of the Canadian Peregrine Foundation reports that “Erin” (b/r) *B/*D, a female produced in 1998 at the Malteurop site (*former Froedtert Malt*) in West Milwaukee, WI was again at 18 King St. in Toronto with “Stormin” (b/b) 30/Y. Much bonding and copulation was observed this spring but no eggs were laid that they know of although they suspect she put down a few on another ledge that she abandoned later. At 18 years old she is showing her age opting to lie down on the ledge in the evenings and/or resting on her tarsi. Even so, she managed to fend off a young and aggressive female this year who persisted in her attempts at a takeover well into the nesting season. Erin prevailed and remains in place.

Above: Erin in Toronto at 18 years of age

Nesting Data: Tracy Simpson, The Canadian Peregrine Foundation

PEREGRINE FALCONS ID'D/FOUND DEAD/INJURED IN WI 2016

Current as of August 30, 2016

The following provides information regarding Peregrine Falcons that (to the best of my knowledge) were identified and/or reported injured or dead in WI.

Falcon IDs are in Blue.

We-Energies Oak Creek Power Plant, Oak Creek, Milwaukee County, WI

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Banded</u>
Flash	M	(b/r) P/00	1156-17367	6/2/2014

Flash was found dead 1-mile SW of Sheboygan Falls, WI on August 10, 2015.

US Bank, Milwaukee, Milwaukee County, WI

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Banded</u>
Leo	M	(b/blu) 01/A	1156-22817	5/29/2015

Leo was found injured on the ground near the Federal Courthouse in Milwaukee on June 18, 2015. He was rehabbed at the WI Humane Society's Wildlife Rehab Center, flight conditioned by falconer Marty Weber and released in April 2016.

WPS Pulliam Power Plant, Green Bay, Brown County, WI

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Date Banded</u>
Madison	M	(b/r) 03/B	1126-06526	5/21/09

Madison was found dead under the Oregon Street Bridge in Sturgeon Bay, WI on April 19, 2016.

Evanston Library, Evanston, Evanston County, IL

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Banded</u>
Deborah	F	(b/r) 04/E	1687-30325	5/27/2009

Deborah was found injured on the UW-Oshkosh campus in Oshkosh, WI on May 16, 2016. She was captured and is in rehab. This falcon has nested at the UW-Oshkosh site since 2011 and has produced a total of 16 young.

US Bank, Milwaukee, Milwaukee County, WI

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Banded</u>
Gidget	F	(b/blu) 38/M	1947-18204	5/16/2016

Gidget was found dead from an apparent window collision at the US Bank site in Milwaukee, WI on June 14, 2016.

WPS Weston Power Plant, Rothschild, Marathon, WI

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Banded</u>
Blaze	M	(b/blu) 50/E	1126-16186	5/26/2016

Blaze was found grounded on site on June 14, rehabbed and released back on site on June 17.

We-Energies Port Washington Power Plant, Ozaukee County, WI

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Banded</u>
Squid	M	(b/blu) 68/A	1126-16179	5/24/2016

Squid was found injured at Port Washington, WI on June 17, 2016 and is in rehab. Eye injuries will likely prevent this falcon from returning to the wild.

Briess Malt & Ingredients Complex, Manitowoc, Manitowoc County, WI
(Formerly Busch Agricultural Resources & Riverland Ag)

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Banded</u>
Prinz	F	(b/blu) 77/N	1687-34583	6/7/2016

Prinz was found injured/recovered and released near its natal site on June 28, 2016.

We-Energies Port Washington Power Plant, Ozaukee County, WI

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Banded</u>
Hecate	F	(b/blu) 55/M	1947-18221	5/24/2016

Hecate was ID'd via webcam in the nest box at the Briess Malt nest site in Manitowoc, WI on July 12, 2016.

Georgia Pacific, Green Bay, Brown County, WI

<u>Name</u>	<u>Sex</u>	<u>Project Band(L)</u>	<u>USFWS Band(R)</u>	<u>Date Banded</u>
Skye	M	(b/r) 51/D	1126-06595	5/28/10
